# Infrastructure Assessment with CloudRecon®

**UnifyCloud™**

## Plan a successful Digital Transformation with a CloudRecon Infrastructure Assessment
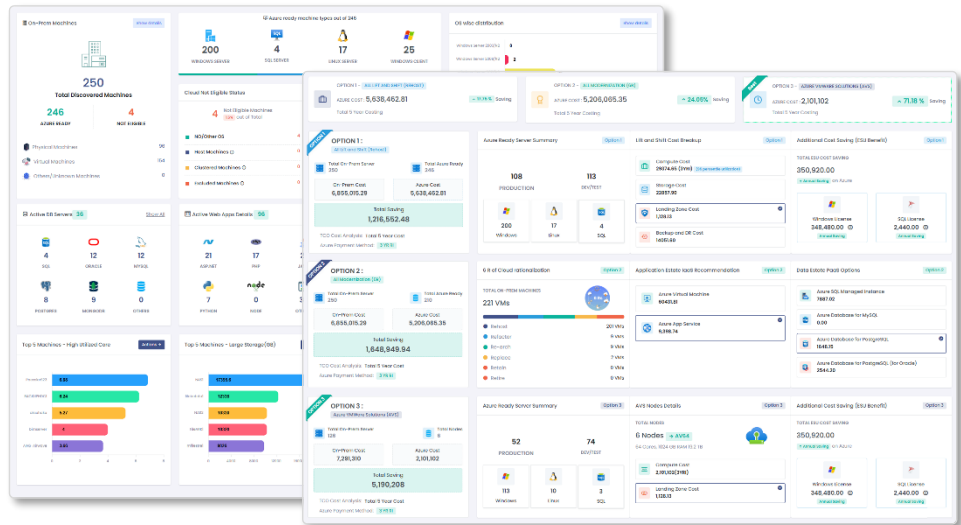

CloudRecon uses infrastructure data from your preferred IT discovery tool to perform an analysis of your on-premises and cloud environments in just minutes. This scan of virtual machines, physical servers, applications, databases, and client machines generates an assessment of the cloud readiness of infrastructure and workloads, outputting a detailed and customizable analysis with cloud migration options, costs and recommendations that can be easily be output into business cases, reports and presentations for delivery to business decision makers.

## Key CloudRecon Benefits and Capabilities

CloudRecon advanced analytics assesses infrastructure data to provide expert insights and detailed recommendations to develop a cloud strategy and guide your cloud migration journey.

### Visibility into your Current Infrastructure
A holistic view of your current on-premises landscape using data from your preferred discovery tool.

### Analysis in Minutes Not Months
Automation saves time effort and expense over arduous manual assessments.

### Modernization Report
A view of your IT infrastructure to identify digital transformation options, including IaaS, PaaS and SaaS.

### Detailed Cost Estimates
Accurate estimates of cost and TCO of moving all or portions of your infrastructure to the cloud.

### Rightsizing Your Cloud
Insights to ensure your current environment is sized correctly to maximize benefits and minimize waste.

### Personalized Cloud Migration Strategy
Analysis and reporting to guide your cloud migration strategy with optimal path recommendations.

**UnifyCloud™**

## Cloud and AI Transformation Platform

# Understand your Business Value Before you Migrate

Get an accurate modernization anlysis with insights into strategic considerations and cost estimates for a variety of cloud scenarios, including valuable Azure Hybrid Use Benefits, with TCO comparisons of the cloud vs. your current environment. Easily determine which plan and architecture makes most sense for your business to maximize ROI of your cloud investment.

# The CloudRecon Discover and Assess Journey

### Step 1
Collect inventory data using your preferred discovery tool

### Step 2
Ingest data into CloudRecon to analyze and assess

### Step 3
Use CloudRecon analytics and insights to develop a strategy

### Step 4
Execute on your planned migration path to the cloud

### Step 5
Secure, manage, and optimize your cloud environment
